

The formulary, also known as a Preferred Drug List (PDL), is a list of common preferred drugs that are generally covered under your medical and prescription drug benefit. Inclusion on the list does NOT guarantee coverage.

This list is not meant to be a complete list of all covered drugs that are on the formulary. This list represents the most common brand (in all caps) and generic (in lower case) drugs available within the formulary.

This formulary list also manages the coverage of outpatient medically administered medications. Please note that coverage and access of medically administered medications are subject to the medical site in which they are obtained and/or administered.

Please call the AscendPBM help desk for any questions or additional assistance in determining access and coverage of medications specific to your employer's plan.

[PA] – Prior Authorization process is required before coverage can be authorized.

[INJ] – injectable or infused medication often requiring healthcare administration.

Any medication claim exceeding \$1,500 may be subject to a prior authorization process.
